Paul Garza, Chair and Members
Mendocino Coast Health Care District

Dear Chairman Garza and Members
of the District Board

I congratulate the Board on its decision to employ Ms. Wiley as Executive Administrator of the Health Care District for the past six months and urge your Board to renew her contract for the next year. As issues with AH are resolved I see the opportunity for the District to study the many health care issues that effect the well being of your constituents. That our county death rate at approximately 15% above the State average is reason enough to see our future need. Until we foresee hiring persons to meet this need the contracting with RGS /should continue enabling the Board to focus on policy.
